Health and Counselling Services

Health and Counselling Services (HCS) is open for in person health services. You can now book a medical appointment through the CHR Connect App or through the CHR Connect Website. If you do not see any appointments available or for other inquiries, please call our office at 613-520-6674 ext. 0.

About Health Clinic Services

Health and Counselling Services (HCS) is located in the Carleton Training and Technology Centre (CTTC) in Suite 2600. It is a multidisciplinary healthcare facility that provides medical services to Carleton University students, faculty and staff. Our services include access to same-day appointments, primary care appointments, nursing visits and lab testing.

A team of professionally trained patient care coordinators, nurses, lab technician, physicians and psychiatrists.

Currently enrolled students at Carleton University and professional services employees, faculty and continuing employees who do not have a dedicated physician and may use this service as their regular family doctor. They may see the walk-in doctor for episodic care.

“Health Services” for CUASA retirees means access to special vaccination clinics and urgent walk-in services. **Please note** that it does not include access to ongoing primary medical care.

CUASA retirees currently using health services for their primary medical care may continue to do so until they find alternative primary care, which they are obligated to do, as per an agreement with the Carleton University Academic Staff Association (CUASA).

Contract Instructors, researchers, visitors (e.g. guest lecturers, athletes from visiting teams) can come to see the same day appointment physician for medical problems that are **episodic in nature** – a cold, an infection, an allergic reaction and so on. They cannot make one of the physicians here their regular doctor.

How to Book an Appointment

Students and staff/faculty can access medical and lab appointments Monday to Friday from 8:30 a.m. to 4:30 p.m.

Appointments can be booked online through the CHR Connect App or through the CHR Connect Website.

With this new app, we would request that students:

- Insert their chosen/preferred name only in the chosen/preferred name section (this is called “Display Name” in the CHR Connect App and “Preferred Name” on the web view)
- Use the drop-down pronoun selection box for pronoun entry. The exception to this is if someone’s pronouns are not offered in the drop-down menu. For example, “he/they”. In that case, please continue to input pronouns into the chosen/preferred name section EACH time you update this field as it will overwrite your prior entry.

Note: Please do this even if you have already given us your chosen/preferred name and pronouns prior, as it will update the electronic medical record display.

TELUS CHR is working on increasing drop-down pronoun options as a future goal.

CUHCS staff will use any of the pronouns that are displayed in the chart (from either the free text in the Preferred name field OR from the drop-down Pronouns section).

Please note: if you are unable to book an appointment online, please call 613-520-6674 during business hours.

A booked appointment is necessary for ongoing primary care concerns. These appointments are not appropriate for the same day appointments:

- Mental Health Management (**Please call the clinic directly to book**)
- Sexually transmitted infection (STI) testing (non-symptomatic) and results
- Birth control
- Gynecological Procedures (IUDs, Nexplanon, etc.)
- Prescription renewals (please **book two months** before prescription runs out)
- Minor dermatology assessment & procedures
- Vaccine Management
- Allergy Management
- Gender affirming care (**Please call the clinic directly to book**)

Health Services same day appointments provide acute/new episodic issues only, including:

- cough/cold
- UTI/STI (symptomatic)
- Acute injury

- Acute skin issues
- Allergic reactions, etc.

Please note: Same day appointments are available from 8:30 a.m. to 3:45 p.m. (or when maximum capacity is reached) operating on a first-come, first-serve basis. Timeslots for the same day appointments are released 24 hours in advance and can be booked online through the CHR Connect App or the CHR Connect Website

Access to nursing to perform vaccines, allergy injections (for those with an allergist outside of Ottawa) wound care, etc.

Access to have blood work and Electrocardiogram (EKG), can be booked online please visit the CHR Connect App or through the CHR Connect Website or call 613-520-6674 during business hours.

If you live within 50 kilometers, you cannot access a primary care appointment if you have a family doctor as per OHIP billing rules.

Students are not able to make primary care physicians their ongoing family physician. Clinic use is only available while you are attending Carleton University for school.

Arrive 15 minutes before appointment. Please ensure to call if you are running late to ensure that the physician able to see you a few minutes late. Most physicians have back-to-back appointments, so they are unable to see patients if over 50% of the appointment time has passed (for example 7 mins late for a 15 min apt). Reminder there is a charge for no shows/late arrival.

Ensure all forms or questionnaires are completed and submitted through the CHR Connect App and bring campus card, health card and/or health insurance to all appointments.

If you require a follow up appointment, especially for medication renewal, we recommend booking immediately following your appointment by scanning QR code in the treatment room you are in or by following directions by physician and presenting to the front to book a follow-up.

Please do not call the clinic to receive your medical test results. You must book a follow-up appointment with your doctor in order to go over the results in detail. Only physicians are authorized to read and provide the results of any medical tests. We will make every effort to contact you if your test results are abnormal. Your physician may send results via our secure messaging system in CHR, please keep an eye out on the email you provided us with.

Students, staff and faculty are responsible for behaving respectfully and following the Students Rights and Responsibilities Policy if applicable and/or applicable staff and

faculty policies in relation to healthy workplace when accessing any services within Carleton University. Abusive behaviours will not be tolerated.

If you are experiencing an emergency and/or an urgent medical problem and the health and counselling services is open, please call Campus Safety 613-520-4444 or dial 4444 from any campus telephone or if able present to the clinic in the CTTC. If you are off campus, call 9-1-1 and/or present to the local hospital's emergency department.

If you or someone you know is sexually assaulted, please connect with Ottawa Rape Crisis Centre at 613-562-2333 and if on campus please call Campus Safety 613-520-4444 or dial 4444 from any campus telephone and off campus call 9-1-1. Counselling Services are available online through the CHR Connect App or through the CHR Connect Website or by calling 613-520-6674 during business hours

Privacy and Confidentiality

Carleton University Health and Counselling Services collects, uses, discloses personal health information to serve our clients and to provide health care. All Carleton University Health and Counselling employees, contract staff, consultants, student peer mentors and volunteers are required to abide by the privacy laws, including Freedom of Information and Protection of Privacy Act (FIPPA) and the Personal Health Information Protection Act (PHIPA).

Health Services currently uses an electronic record keeping system called Collaborative Health Record (CHR). Access to medical records in CHR is restricted to Health and Counselling employees and information is protected through the use of technical and administrative safeguards such as restricted access permissions, multi-factor authentication and use of other industry standard security controls.

Under exceptional circumstances Carleton University Health and Counselling Services, through personnel authorized to make such decisions, may disclose personal health information of a client if necessary to comply with legal and/or professional obligations with or without their consent if:

- There are reasonable grounds to believe that a client is at significant risk for the serious harm to themselves or another person.
- There are reasonable grounds to believe that a child is at risk of being abused or neglected.
- The client's personal health information has been subpoenaed by a court of law.
- The client's disclosed that they have been sexually abused by a regulated health professional.

What is an AI Medical Scribe?

AI medical scribes are digital tools that help healthcare providers document your appointment in real time. Instead of typing during your visit, the AI listens, transcribes, summarizes and generates a clinical note. Carleton Health has approved Tali AI, Scribeberry, and Heidi AI for documentation support only. These tools do not make clinical decisions or diagnoses. While concerns about misinterpretation, “hallucinations,” and racial bias in AI models exist, your provider will always review, edit, and approve the note before it becomes part of your medical chart.

Privacy and Data Security

All platforms used at Carleton Health comply with Canadian and Ontario privacy laws, including the Personal Health Information Protection Act (PHIPA) and the Personal Information Protection and Electronic Documents Act (PIPEDA). Each tool has been reviewed and approved by Carleton University’s privacy and legal teams.

Carleton Health recognizes PIPEDA does not yet have specific guidance on AI scribes or de-identified health data. We will monitor legal developments and adjust our use of AI scribes accordingly. Note: Carleton Health will not notify patients of data breaches at AI scribe companies. You may ask your provider which AI scribe is used and contact the company directly if concerned.

Data Storage and Handling

- Platforms minimize long-term storage of identifiable data.
- Audio recordings of patient voices are retained temporarily for transcription and quality assurance. Audio recordings of a provider’s voice alone may be stored. Transcripts are typically made of the audio recordings. Most platforms do not retain transcripts long-term.
- De-identified audio or transcripts may be used to train the AI scribe to improve quality.
- We are monitoring ongoing research and legal developments on the potential re-identification of de-identified health data.
- All three platforms use end-to-end encryption, access controls, and secure cloud infrastructure (e.g., Microsoft Azure or equivalent) to safeguard your information.
- Any retained data is stored in Canada or in compliance with Canadian laws
- Ask your provider which AI scribe is being used for more information.

Your Rights and Choices

- You may decline or withdraw consent at any time; without compromising access to care.
- Consent may vary by visit or encounter, just inform your provider.
- If you do not consent to the use of an AI scribe, traditional documentation will be used.
- You may request further information at any time regarding how your data is handled.

Disclaimer: This form is based on Carleton Health & Counselling Services' understanding of available documentation and privacy policies provided by Tali AI, Scribeberry, and Heidi AI as of 2025. The privacy practices, data handling procedures, and platform functionalities of these services may change over time

Feedback and Complaints

Students have the right to provide feedback or register a complaint if they are concerned about the way their information has been managed (privacy) or about the care they have received in health care services. Please see this link to provide information: Feedback – Health and Counselling Services.

If you have any further feedback to share, please email HCSadmin@carleton.ca. Please note that this email is reserved for patient feedback only.
